True to our Yankee independence and ingenuity, people and organizations all over Northern New England are coming together in new and innovative ways to respond to the rapidly emerging needs of older residents.

These organic, community-based responses range from informal groups of neighbors helping neighbors, to community members designing and running programs in partnership with other organizations, to formal efforts by towns and municipalities to create Age Friendly Communities that address the needs of older adults more comprehensively.

It is in our collective interest to work together to bring attention to these issues, to identify the best strategies to meet the needs of older adults, and to create other opportunities for shared learning about aging across our region.
